

Digital footprint	The content someone shares about themselves online.
Digital personality	The person that companies, organisations and other people see based on their digital footprint.
Online reputation	The judgement of a person from information shared by themselves and others online.
Personality	The qualities and characteristics that make you who you are.
Selfie	A self-portrait that a person takes of themselves using a camera on a digital device or smartphone.
Sharing online	The way people communicate (share and receive information) with each other over a computer network, such as the internet.

Our digital footprint can affect our online reputation in a positive or negative way.

Using avatars, usernames and not sharing personal information are good ways to reduce both your digital footprint and digital personality.

Before you share online think:

Who do I want to see this?

Do I need to ask someones permission?

Is this something I should be sharing?

Am I sharing something I know is true?

Sometimes things online can make us feel sad, worried, uncomfortable or frightened.

Telling a trusted adult, using privacy settings and blocking/reporting/screengrabbing are some of the ways to get help and make sure any problems online are dealt with in a proper and safe manner.
