

Senses	Senses allow us to observe and understand the world around us. There are five main senses.
Touch	Touch allows you to tell if something is hot or cold, dull or sharp, rough or smooth, wet or dry.
Sight	Sight (also called eyesight or vision) is one of the senses. Having sight means to be able to see.
Hearing	Hearing is the ability to detect sound.
Taste	The ability to detect the flavour of substances such as food.
Smell	Involves the detection and perception of chemicals floating in the air.
Skeleton	The bones of the body form a framework called the skeleton.
Bones	Bones provide support for our bodies and help form our shape.
Organs	A group of different tissues working together to perform a job inside the body.

## Key knowledge

Body Parts

All of our body parts have different jobs to do.

Senses

Humans have senses. These senses are accessed through different parts of the body,

## Working Scientifically

Asking questions Making predictions Setting up tests

Observing and measuring Recording data

Interpreting and communicating results Evaluating
